IEK8 IN-LINE ELBOW KIT

The IEK8 In-Line Elbow Kit allows the CDB8 to be installed in-line, maintaining a straight line exhaust duct. It replaces a 42" section of straight duct. Includes (2) 8" diameter sweep elbows, (1) 12" length and (1) 4" length of 8" diameter duct. Use tapered transitions prior to and after elbows if duct size of manifold is larger. **DO NOT** use sheet metal screws to join sections. Aluminum duct tape is preferred. Follow all local codes and use suitable methods for supporting CDB8 and all attached duct.

INSTALLATION

Install 12" piece of 8" diameter duct over Inlet of CDB8 and over one Sweep Elbow. **DO NOT** use sheet metal screws to join sections. Aluminum duct tape is preferred.

Install 4" piece of 8" diameter duct over Outlet of CDB8 and over one Sweep Elbow. **DO NOT** use sheet metal screws to join sections. Aluminum duct tape is preferred.
