KIT INCLUDES: (1) Terminus Drip Deflector

INSTALLATION STEPS

1.) Remove bottom screw from Terminus. Be careful not to lose spacer between Terminus flanges.

2.) Remove caulk from bottom of Terminus between interior flange and wall.

3.) Insert Drip Deflector between Terminus interior flange and wall. Hole in Drip Deflector must line up with holes in Terminus flanges, (Diag. A).

4.) Reinstall screw removed in step 1. Make sure spacer is still between Terminus flanges, (Diag. A)

5.) Apply caulk around Drip Deflector and Terminus interior flange, (Diag. B).
