The Tjernlund UnderAire™ Series Fresh Air Supply Fans for Crawl Spaces are designed to boost fresh outdoor air underneath homes and porches. Use in conjunction with Tjernlund UnderAire™ Crawl Space Exhaust Fans to remove moisture in Crawl Spaces with too few or undersized passive vent openings, overall lengths of over 40 feet, or in “dead zones” or stagnant areas that are not served by existing foundation vents.

Excessive humidity levels in Crawl Spaces is the leading cause of premature rotting of support columns, joists, floors and beam supports. Humidity can promote fungus growth and increased termite activity. Humidity may also cause plumbing failures due to rust and corrosion. Helps dilute radon gases, treated wood off-gassing and other odors that might migrate into living areas.

All models are equipped with a factory installed and pre-wired freeze protection thermostat which will prevent operation of the fan below 35°F.

**SPECIFICATIONS**

**MODEL CS1 Fresh Air Supply Fan:**
- Capacity: 110 CFM
- Motor: 115 Volts ~ 50/60 Hz 0.30 amps maximum
- Thermostat: On at 50°F Off at 35°F
- Dimensions: 18” x 9” x 2”
- Mounting Plate Smallest Trimmable Dimensions: 7” x 6”

**MODEL CS2 Fresh Air Supply:**
- Capacity: 220 CFM
- Motors: 2 @ 115 Volts ~ 50/60 Hz 0.60 amps maximum
- Thermostat: On at 50°F Off at 35°F
- Dimensions: 18” x 9” x 2”
- Mounting Plate Smallest Trimmable Dimensions: 13” x 6”

**GENERAL INFORMATION**

Each UnderAire™ Powered Fresh Air Supply Fan is electrically factory line tested before shipment.

After opening carton, inspect thoroughly for shipment damage. Fan should rotate freely and all electrical wires and connections should be secured. If any damage is found, notify freight carrier and your distributor immediately and file a concealed damage claim.

**RECOMMENDED APPLICATION**

The CS1 & CS2 Powered Fresh Air Supply Fans are designed to be used in conjunction with Tjernlund V-Series exhaust Crawl Space Ventilators (V1, V1D, V2D). Use without exhaust fans may limit the effectiveness of these fans and cause positive pressurization of the space which can result in property damage. For optimal performance match CFM of supply fan to CFM of exhaust fan. For example: (1) CS1 per V1 or V1D and (1) CS2 per V2D.
The Fresh Air Supply Fan must be installed by a qualified installer in accordance with these instructions and all local codes or in their absence in accordance with the latest editions of the International Residential Code and International Electrical Code. Improper installation can create a hazardous condition such as fire, electric shock or personal injury. To reduce these risks significantly, use this unit only in the manner intended by the manufacturer. If you have questions, contact Tjernlund Products. Always disconnect the Fresh Air Supply Fan from its power source before installation and servicing.

**CAUTION:** For general ventilation use only. Do not use to exhaust hazardous or explosive materials and vapors.

**WARNING:** To reduce the risk of fire or electric shock, do not use this fan with any solid-state speed control device.

**TOOLS REQUIRED**

- 5/16" Nut Runner or Flat Head Screw Driver
- Drill with 5/16" Masonry Bit if mounting on brick or foundation block
- Grounded Electrical Outlet within 6 feet of fan location.

**LOCATION**

Mount Fresh Air Supply Fan from the outside (remove existing vents if necessary) or inside the crawl space behind existing foundation ventilation openings, (See Diagram A). Alternately, attach to joist to act as a “dead zone” circulation or stagnant area fan, (See Diagram B).

**IMPORTANT:** Crawl Space Supply Fan must be mounted with the electrical control box and motor facing the interior of the crawl space. Improper installation can create a hazardous condition such as fire, electric shock or personal injury.

1. Remove existing doors or covers on ventilation openings around the perimeter of the building.

2. Position the Crawl Space Supply Fan over the ventilation opening. To minimize moisture accumulation near power supply, the unit should be oriented with the cord coming out on the top side of the fan(s), (See Diagrams Below).

3. If installing on foundation block or brick, mark location in the (6) mounting locations of the metal face plate and drill 5/16” holes with masonry bit. Install wall anchors into openings and secure Fresh Air Supply Fan to the wall with (6) screws. If installing on rim joist or mesh on existing crawl space vent, secure Fresh Air Supply Fan with (6) screws, washers and nuts in the (6) mounting locations on metal face plate, (See Diagram A).

   If installing on a joist / truss secure Fresh Air Supply Fan with (3) screws and washers in the top (3) mounting locations on metal face plate, (See Diagram B).

4. Plug unit(s) into electrical outlet or use the optional Tjernlund DH2P Dehumidistat Control.

WARRANTY

TJERNLUND LIMITED ONE YEAR WARRANTY

Tjernlund Products, Inc. warrants to the original purchaser of this product that the product will be free from defects due to faulty material or workmanship for a period of (1) year from the date of original purchase or delivery to the original purchaser, whichever is earlier. Remedies under this warranty are limited to repairing or replacing, at our option, any product which shall, within the above stated warranty period, be returned to Tjernlund Products, Inc. at the address listed below, postage prepaid. THERE ARE NO WARRANTIES WHICH EXTEND BEYOND THE DESCRIPTION ON THE FACE HEREOF. AND TJERNLUND PRODUCTS, INC. EXPRESSLY DISCLAIMS LIABILITY FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING FROM THE USE OF THIS PRODUCT. THIS WARRANTY IS IN LIEU OF ALL OTHER EXPRESS WARRANTIES AND NO AGENT IS AUTHORIZED TO ASSUME FOR US ANY LIABILITY ADDITIONAL TO THOSE SET FORTH IN THIS LIMITED WARRANTY. IMPLIED WARRANTIES ARE LIMITED TO THE STATED DURATION OF THIS LIMITED WARRANTY. Some states do not allow limitation on how long an implied warranty lasts, so that limitation may not apply to you. In addition, some states do not allow the exclusion or limitation of incidental or consequential damages, so that above limitation or exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which may vary from State to State. Send all inquiries regarding warranty work to Tjernlund Products, Inc. 1601 9th Street, White Bear Lake, MN 55110-6794.
